

POR01PG45-5

- ❖ Parentage: Serrana x Bulked pollen of red-fleshed parents
- ❖ Purple skin with light yellow flesh
- ❖ High percentage of tubers are <6 oz with average tuber size of 4.3 oz

Purple skin with yellow fleshed, oblong tubers and shallow eyes. Yields were lower than Yukon Gold and Purple Majesty. No internal or external defects or shatter bruise were observed although there was a small amount of blackspot. There were 54% < 4 oz and 33% in the 4 - 6 oz categories. Fry color was light and uniform with good texture for baking, boiling and microwaving.
