APHIS LIFTS RESTRICTIONS ON ALBERTA SEED POTATOES EFFECTIVE JANUARY 28, 2009

The United States Animal and Plant Health Inspection Services (APHIS) will be lifting the restriction on Alberta Seed Potatoes beginning January 28, 2009. This is based on the results of soil sampling by CFIA and confirmation that all seed comes from fields that were sampled and tested and shown to be free of PCN.

Contact your local CFIA office to coordinate your export activities.
