

## Mini-tuber Orders for 2018

Jenny Durrin at the Nuclear Seed Potato Lab at the University of Idaho is starting to multiply tissue culture plantlets for the next greenhouse crop which will be available Spring 2018.

Mid-December is the deadline if you are interested in ordering any long dormancy varieties such as Teton Russet, Alpine Russet or others. Long Dormancy lines are starred\* and in bold below-

Due to limited greenhouse space, shorter dormancy varieties should also be ordered at this time. Deadline is early February.
